🏠 Address: 66/A Indira Road,
Farmgate, Dhaka-1216

SKILLS

CAD & Design

- SolidWorks
- Assembly Design & Weldments

Simulation

- ANSYS Workbench (FEA)

Manufacturing

- Design for Manufacturing (DFM)
- Welding & Fabrication

Other

- MS Office • MATLAB
- Technical Presentations
- Cross-functional Collaboration

LANGUAGE

- English
- Bengali (Native)

HOBBIES

- Cycling
- Reading
- Travelling

Summary

Results-driven Mechanical Design Engineer with hands-on experience in motorsport engineering, CAD product design, and sustainable design. Skilled in chassis design, simulation, and aerodynamics through Formula Student competitions (Formula Bharat & FS Combustion China). Builds functional prototypes from concept to fabrication, including a Formula Student chassis, a recycled-parts F1 car, and a folding drone frame. Published researcher in sustainable materials.

Experience

Bangla Trac Limited – Bangla CAT (Intern)

May 2025 – June 2025

Hands-on experience with diesel & gas generators, including alternator, piston, camshaft, bearing, and cooling system servicing. Operated load banks, jib cranes, and honing machines. Conducted simulations, system design, and technical presentations. Gained expertise in generator operation, maintenance, and diagnostics.

MIST Blitz (Senior Engineer & Finance Member)

Apr 2024 – July 2026

Designed first chassis and performed simulation in ANSYS. Managed team budget, subsystem costs, and procurement. Iterated designs through testing and cross-functional technical collaboration.

Projects

- **Formula Student Racing Chassis Design** — designed and optimized a space-frame chassis balancing structural rigidity, driver safety, and manufacturability. SolidWorks Weldments, ANSYS FEA.
- **F1 Car From Scrap (Recycling Project)** — designed and fabricated a miniature F1-inspired vehicle from recycled engine components. SolidWorks, welding, laser cutting.
- **Folding Drone Frame Design** — designed a lightweight, foldable drone frame with integrated motor, battery, and electronics mounting points. SolidWorks, 3D printing.

Education

Bachelor of Engineering in Mechanical Engineering

Military Institute of Science and Technology, Dhaka, Bangladesh

Mar 2022 – June 2026 | CGPA: 3.27/4.00

- **Relevant Coursework:** Noise and Vibration, Solid Mechanics, Fluid Mechanics, Machine Design, Aerodynamics, Internal Combustion Engines, Engineering Materials.

Certifications, Publications & Achievements

- **Business Analysis & Process Management** – Coursera (July 2026)
- **Published research paper** on environment-friendly ecobricks as a sustainable structural element (ICMEAS 2025).
- Best Foreign Team Award — Formula Student Combustion China (FSCC) 2025
- Best Presentation Performance, Static Event — FSCC 2025
- 4th Place, Business Plan Presentation — FSCC 2025
- Participant — Formula Bharat 2025
